Index to Volume 31 (1999)

No 1 (January) pp 1–84
No 2 (February) pp 85–162
No 3 (March) pp 163–236
No 4 (April) pp 237–302
No 5 (April) pp 303–362
No 6 (May) pp 363–428
No 7 (June) pp 429–484
No 8 (July) pp 485–540
No 9 (August) pp 541–596
No 10 (September) pp 597–656
No 11 (September) pp 657–734
No 12 (October) pp 735–794
No 13 (November) pp 795–856
No 14 (December) pp 857–924

Article Index

January

Geometric Modelling and Processing
M.-S. Kim and R. Martin 1

An introduction to line geometry with applications
H. Pottmann, M. Peternell and B. Ravani 3

On the computational geometry of ruled surfaces
M. Peternell, H. Pottmann and B. Ravani 17

The intersection of two ruled surfaces
H.-S. Heo, M.-S. Kim and G. Elber 33

Surface interpolation based on new local coordinates
K. Sugihara 51

Medial axis transform and offset curves by Minkowski Pythagorean hodograph curves
H. I. Choi, C. Y. Han, H. P. Moon, K. H. Roh and N.-S. Wee 59

Cubic Pythagorean hodograph spline curves and applications to sweep surface modeling
B. Jüttler and C. Mäurer 73

February

CUSTOM-CUT: a customizable feature recognizer
D. M. Gaines and C. C. Hayes 85

Quadric surface extraction using genetic algorithms
Y. H. Chen and C. Y. Liu 101

One-sided arc approximation of B-spline curves for interference-free offsetting
S.-H. Frank Chuang and C. Z. Kao 111

Generating resource based flexible form manufacturing features through objective driven clustering
R. Stage, C. Roberts and M. Henderson 119

Knowledge base and database representation for intelligent concurrent design
D. Xue, S. Yadav and D. H. Norrie 131

Computing offsets of NURBS curves and surfaces
L. A. Piegl and W. Tiller 147

March

Offsets, sweeps and Minkowski sums
G. Elber and M.-S. Kim 163

An overview of offset curves and surfaces
T. Maekawa 165

A computing strategy for applications involving offsets, sweeps and Minkowski operations
E. E. Hartquist, J. P. Menon, K. Suresh, H. B. Voelcker and J. Zagajac 175

The dual of sweep
H. T. Ilies and V. Shapiro 185

Rational motion-based surface generation
B. Jüttler and M. G. Wagner 203

Trimming swept volumes
D. Blackmore, R. Samulyak and M. C. Leu 215

Collision-free 3-axis milling and selection of cutting tools
G. Glaeser, J. Wallner and H. Pottmann 225

April

An adaptive tool path generation algorithm for precision surface machining
Y.-J. Lin and T. S. Lee 237

The flattening of triangulated surfaces incorporating darts and gussets
J. McCartney, B. K. Hinds and B. L. Seow 249

Genetic algorithms for optimized re-triangulation in the context of reverse engineering
Y. H. Chen and Y. Z. Wang 261

Representation and interpretation of geometric tolerances for polyhedral objects. II. Size, orientation and position tolerances
U. Roy and B. Li 273

Shapes with offsets of nearly constant surface area
M. Alhanaty and M. Bercovier 287

April

Interference detection and optimal tool selection in 3-axis NC machining of free-form surfaces
D. C. H. Yang and Z. Han 303

Region-based adaptive slicing
K. Mani, P. Kulkarni and D. Dutta 317

A topology construction from line drawings using a uniform plane subdivision technique
B. Žalik 335

The speed-controlled interpolator for machining parametric curves
S.-S. Yeh and P.-L. Hsu 349

Freehand drawing system using a fuzzy logic concept
S. F. Qin, I. N. Jordanov and D. K. Wright 359

May

Object reconstruction by incorporating geometric constraints in reverse engineering
N. Werghi, R. Fisher, C. Robertson and A. Ashbrook 363

Computation of a geometric model of a machined part from its NC machining programs
U. Roy and Y. Xu 401
A dual geometry–topology constraint approach for determination of pseudo-swept shapes as applied to hexahedral mesh generation
S.-S. Liu, J. Uicker Jr and R. Gadh 413

June
Synthesis of consolidated data schema for engineering analysis from multiple STEP application protocols
J. Liang, J. J. Shah, R. D'Souza, S. D. Urban, K. Ayyaswamy, E. Harter and T. Bluhm 429
Segmentation of measured point data using a parametric quadric surface approximation
M. Yang and E. Lee 449
Meshfree simulation of deforming domains
V. Shapiro and I. Tsukanov 459
CAD-based path planning for 3-D line laser scanning
F. Xi and C. Shu 473

July
Texture prediction of milled surfaces using texture superposition method
B. H. Kim and C. N. Chu 485
Shape error evaluation method of free-form surfaces
K. Kase, A. Makinouchi, T. Nakagawa, H. Suzuki and F. Kimura 495
Data reduction of polygonal curves using B-splines
E. Saux and M. Daniel 507
Seed-growing segmentation of 3-D surfaces from CT-contour data
S. Liu and W. Ma 517

August
A framework for object modeling
V. Kumar, D. Burns, D. Dutta and C. Hoffmann 541
Efficient cutter-path planning for five-axis surface machining with a flat-end cutter
C.-C. Lo 557
Multiple sweeping using the Denavit–Hartenburg representation method
K. Abdel-Malek and S. Othman 567
Toward the uniform coverage of surfaces by scanning curves
H.-y. Tam 585

September
Planar domain simplification for modeling virtual-solids in plant and machinery layout
N. S. Sapidis and G. Theodosiou 597
Information modelling for made-to-order virtual enterprise manufacturing systems
W. J. Zhang and Q. Li 611
A configuration space approach to the automatic design of multiple-state mechanical devices
C. L. Li, K. W. Chan and S. T. Tan 621

September
Geometric languages and interfaces
G. Jared and V. Shapiro 657
A geometrical product specification language based on a classification of symmetry groups
V. Srinivasan 659
A framework for system specification using chains on cell complexes
R. Egli and N. F. Stewart 669
Set-combinations of the mixed-dimension cellular objects of the Djinn API
A. E. Middleditch, C. M. P. Reade and A. J. Gomes 683
A programming approach for complex animations. Part I. Methodology
C. Bajaj, C. Baldazzi, S. Cutchin, A. Paoluzzi, V. Pascucci and M. Vicentino 695
A programming approach for complex animations. Part II. Reconstruction of a real disaster
A. Paoluzzi and A. D'Ambrogio 711

October
A pair-wise offset algorithm for 2D point-sequence curve
B. K. Choi and S. C. Park 735
Bézier representation of epitrochoids and hypotrochoids
J. Sánchez-Reyes 747
Feature-based reverse engineering of mannequin for garment design
C. K. Au and M. M. F. Yuen 751
A shape-generating approach for multi-axis machining G-buffer models
C.-J. Chiou and Y.-S. Lee 761
Undercut feature recognition in an injection mould design system
M. W. Fu, J. Y. H. Fuh and A. Y. C. Nee 777

November
A unified approach to verification in 5-axis freeform milling environments
G. Elberand E. Cohen 795
A computer aided tolerancing model: proportioned assembly clearance volume
D. Teissandier, Y. Couétard and A. Gérard 805
Shape blending of curves and surfaces with geometric continuity
K.C. Hui 819
Evaluation of straightness and flatness error using computational geometric techniques
G.L. Samuel and M.S. Shunmugam 829
An exact minimum zone solution for sphericity evaluation
J. Huang 845
Erratum to: Multiple sweeping using the Denavit–Hartenberg representation method
K. Abdel-Malek and S. Othman 855

December
Planar G^2 transition between two circles with a fair cubic Bézier curve
D. J. Walton and D. S. Meek 857
Geometric constraint satisfaction using optimization methods
J.-X. Ge, S.-C. Chou and X.-S. Gao 867
The crossing function and its application to zig-zag tool paths
S. E. Sarma 881
A generic approach to recognising isolated, nested and interacting features from 2D drawings
S. Meeran and J. M. Taib 891
A note on approximation of discrete data by G^1 arc splines
J.-H. Yong, S.-M. Hu and J.-G. Sun 911

PII: S0010-4485(99)00101-3
